The solution that meets all your needs:

Defibrillator Systems

A defibrillator is an electronic device that is used to send an electric current to help the heartbeat return to normal, when in arrhythmia is happening. We can propose Manual Defibrillators or Automated External Defibrillators (AED).

Defibrillator Electrodes

For the different types of defibrillator, we offer adult and pediatric electrodes.

Defibrillator Paddles

For the different types of defibrillator, we offer adult and pediatric paddles.
