

Product group: Medical Measuring

BUSINESS LINE: MEDICAL

The solution that meets all your needs:

Weight Scales

Used in medical examinations, clinical tests to measure patient's weight and experiments as a "go to" equipment for patient evaluation (weights, BMI).

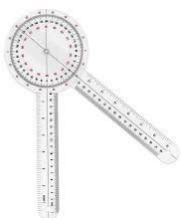

Height Scales

A Height Scale, also called Stadiometer, is a medical device used for measuring patient height. Height Scales are part of the common medical equipment used in routine examinations.

Combo Scales

Used to measure patients' weight and height. Allows to use a single device instead of two.

Other Measuring

We propose a wide range of measuring devices such as Measuring Tape, Goniometer...
